

Spartan Engineers
Innovative Engineering Solutions

COMPANY PROFILE

Spartan Engineers has been founded by Ms. Rohita Dhawankar with a group of Technocrats in 2018, with the idea of creating a large umbrella organization to assist and serve the growing Indian Tooling and Automation Industry and to help the market with its years of experience in the field of Hand Tools and its applications. **our product quality is export oriented as per industry demands**

We are the leading manufacturers and traders of Manual Hydraulic and Electric Torque Wrenches, Bolt Tensioner, Torque Multiplier, Nozzles, pipe cutting and bevelling machines. We have a team of highly experienced professionals who are hired on the basis of their skills and ability. Our team having core expertise in bolt tensioning solutions and its applications. Our products are manufactured using latest technology to offer technically advanced range of products with the focus on quality and we proudly produce products which are CE certified. Owing to rich industrial experience, our range is demanded by our clients due to features like durability, sturdy construction, dimensional accuracy and high tensile strength.

PRODUCTS

Manual Torque wrenches

(ratchetable and standard types)

Upto 2700 Nm

Hydraulic torque wrenches

**Square drive type
(Upto 78630 Nm)**

**Hex Type
(Up to 48337 nm)**

Impact Sockets with accessories

Hydraulic Bolt tensioners

Up to 4754 Kn

Bolt tensioning is now the preferred method of tightening bolts and studs on all critical applications. Bolt tensioners are designed for operation in a wide variety of applications including pipeline flanges, heat exchangers, pressure vessels, compressor covers, boiler feed pumps, windmills and many others

Hydraulic nut splitter

From 1/2" to 5.3/8" A/F

Standard Features :

- No spark or flame. No risk to volatile surrounding.
- Triangular Chisel providing three cutting edges.
- Light and compact design for ease of operation and handling.
- Dedicated cylinder with minimal stroke for faster operation.
- Rear end connection for ease of handling and safe-connection.
- Laser marked for easy setting. No separate spacer for each Nut.
- 700 bar working pressure.
- Calibrated system. No damage to stud / bolt threads.

Slugging Wrench

- Wrenches are available in all metric and inch sizes upto 9 1/4" (230 mm) A/F.
- We also manufactures podger spanners or podger wrenches (Structured Wrenches).

Torque Multiplier

It is a simple gear box, works on the principle of 'Epicyclic Gearing'. The given load at the input gets torque multipliers as per the multiplication factor and transmitted at the output, there by with a minimum efforts you achieve greater load. Designed as per application

Spray Nozzles

We also mfg nozzles as per industrial application

Registered Office Address – I wing 209, Gagan Marvel , New Link Road, Vasai (East) Mumbai -401209
